

Projet

Project

A photograph of a lumber yard filled with stacks of weathered wooden planks. The planks are arranged in neat piles, showing various shades of brown and grey from age and exposure. In the lower-left foreground, the green metal handle and orange tip of a wheelbarrow are visible. The word "Index" is centered in the middle of the image, underlined.

Barn Box

Charpente Timber frame

Lors du démontage des granges pour le bardage, nous récupérons aussi les poutres et les planchers d'origine. Les poutres sont essentiellement taillées à la hache ou sciées.

Essences: ore, frêne, pin blanc, douglas.

A partir de ces matériaux, nous vous proposons des projets sur mesures. Nos charpentiers pourront réaliser une taille en tenon-mortaise ou des assemblages par connecteurs métalliques.

When dismantling barns for siding we also recover beams and floors. Beams essentially hand hewn and sawn.

Species: elm, ash, white pine, douglas.

From this recovery material, we can propose custom made timber frames. Our carpenters can make joined and tenone or metal connexions assembled.

Etape 1 - Step 1

Démonter - Dismantle

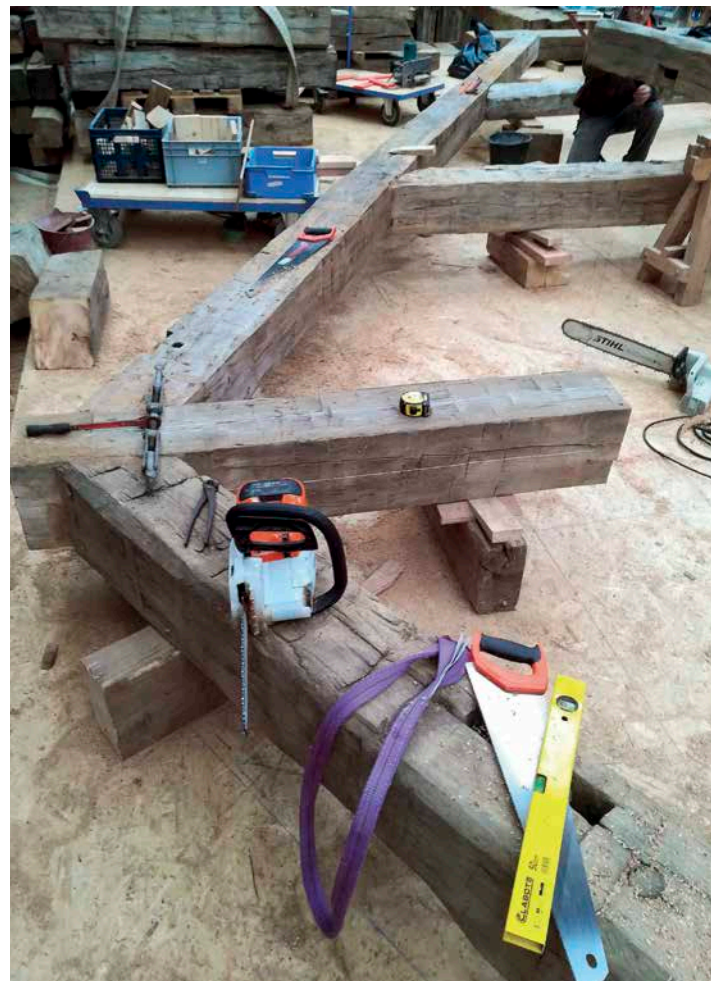

Etape 2 - Step 2

Trier - To sort

Etape 3 - Step 3

Nouveau projet - New project

Etape 3 - Step 3

Pré-montage / Pre-assembly

Etape 4 - Step 4

Re-construction sur site - Rebuild on site

Lors du démontage de nos granges, il arrive que nous découvrons de très belles charpentes essentiellement taillées hache que nous proposons en kit à remonter. Après démontage de la charpente, nous restaurons les pièces abîmées puis numérotons chaque élément reporté sur un plan pour le remontage. Nous trouvons aussi d'anciennes granges en madrier (Pièces sur pièces) que nous proposons en kit dans le même principe que les charpentes.

When disassembling our barns, sometimes we discover beautiful timber frame structures essentially hand hewn, we offer a kit to refurbish them. After removal of the frame we restore the damaged parts and will number each item on a drawing for reassembly. Sometimes we find old barns with logs structures, we offer a kit in the same way as the timber frames.

Habillage

Cladding

Intérieur - Indoor

Extérieur - Outdoor

Nos bardages proviennent d'anciennes granges canadiennes et européennes. Ils peuvent être utilisés pour des habillages intérieurs et extérieurs.

Les bardages sont, grisés, marrons, en madriers déco taillés à la hache ou avec des peintures d'origine (rouges, blancs, noirs, verts).

Our wall cladding is carefully salvaged from old Canadian and European barns. It can be used in both interior and exterior applications.

Cladding options: grey, brown, axe-hewn decorative beams or with original paint works. (eg. red, white, black, green).

Bois gris brossé canadien

Canadian grey brushed

The image displays three distinct styles of wood flooring planks arranged on a white background. The top plank is dark, heavily textured, and shows signs of aging and wear. The bottom-left plank is light-colored, smooth, and has a clean finish. The bottom-right plank is a medium grey color with a distressed, weathered appearance, featuring white paint splatters and a rough texture. The text 'Plancher' is positioned above 'Flooring', separated by a horizontal line.

Plancher --- Flooring

Nos planchers sont fabriqués à partir de vieux bois ou de bois neuf vieillis (orme, frêne, chêne, sapin). Les planchers sont proposés en massif ou en multiplis (pour chauffage par le sol).

Type de plancher: lame, point de Hongrie, bâton rompu et Versailles.

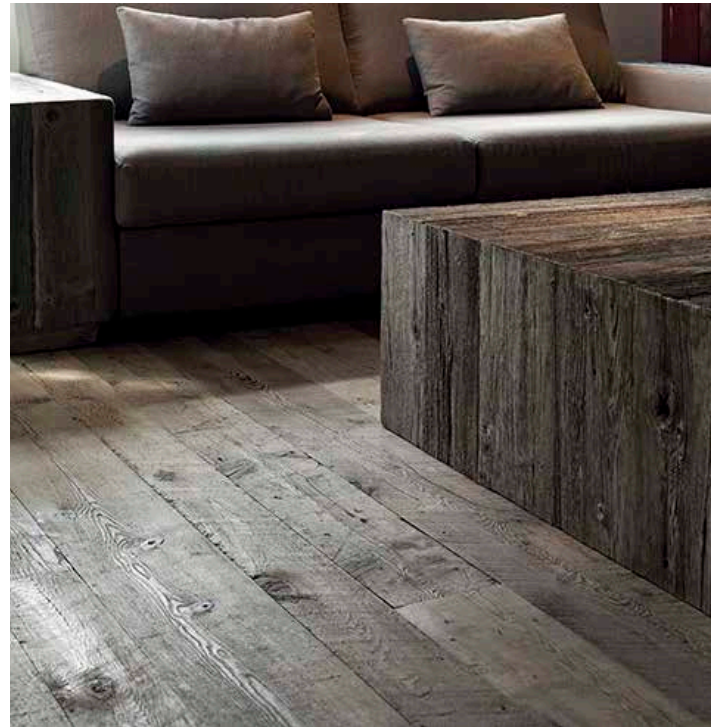

Our flooring is offered in both reclaimed wood, and new wood options. (elm, ash, oak, douglas fir). Available in both solid and engineered flooring (underfloor heating).

Flooring styles include: plank flooring, Hungarian point, Herringbone and Versailles panels.

Module

Complétez votre offre de logement de façon temporaire ou définitive, augmentez votre surface habitable ou de bureaux. Le concept Barn Box by Atmosphère & Bois s'inspire d'un mode constructif de maisons «basse énergie» en ossature bois.

Nous vous proposons deux types de constructions :

- Module préfabriqué
- Module sur mesure

The Barn Box concept is inspired by a focus on the environment with «green» construction in mind. The Barn Box offers a cozy and completely renovated space. Its robust structure allows it to be moved easily, without the inconvenience of heavy foundations. It provides a functional housing option either permanently, temporarily, or even to increase your office space.

We offer two types:

- Pre-fabricated Models
- Custom Built Models
